INSORB[®] Subcuticular Skin Stapler

Plastic Surgery

Peter A. Vogt, M.D., F.R.C.S. (C)

Plastic Surgery Center, Wayzata, MN

Number of Patients:	Over 30 patients
Average OR Time Savings:	20 - 30 Minutes (Abdominoplasty) 15 - 20 Minutes (Breast Reduction & Mastopexy)
Reduction in Suture Packs:	We reduced suture packs by 30 - 50% per case.
Reduction in Infections:	Yes. We have had no infections with the INSORB Stapler to date.
Reduction of Wound Complications:	Yes. We have had no seromas or hematomas to date with the INSORB Stapler.
Improved Cosmesis:	All of our incisions appeared to be equivalent with respect to cosmesis with a number of incisions closed with INSORB Staples that appeared to be superior.
Improved Patient Satisfaction:	Yes. Patients have remarked of their satisfaction with regard to comfort and cosmesis of their wounds closed with INSORB Staples.
Other Comments:	The initial experience suggests that the use of the INSORB Stapler provides a significant time savings, is cost-effective and results in a high degree of patient satisfaction for many plastic surgery procedures.
