## INSORB® Absorbable Subcuticular Skin Stapler

### Plastic Surgery

Thomas D. Dressel, M.D.  
Kathy Fink, Surgical Assistant  
Edina, MN

Number of Patients:	Over 50 patients
Average OR Time Savings:	40 - 50 Minutes (Breast Reduction) 40 - 50 Minutes (Abdominoplasty)
Reduction in Infections:	Yes. Appears to be less infection with INSORB Staples.
Reduction of Wound Complications:	Yes. We see much less slow wound healing. Patient comfort level is improved.
Improved Cosmesis:	Yes. We have observed an improved cosmetic result with the INSORB Absorbable Staples.
Improved Patient Satisfaction:	Yes. Reduced operative and anesthesia time, less pain, and improved scar with INSORB Stapler.
Other Comments:	Hand fatigue is greatly reduced by using INSORB Stapler versus sutures.
